**Learning styles in research work – learn and work efficiently:**

We all learn and work in highly individual ways, but often we do not know what is best for us, we are unaware of our strengths and preferences. For better or for worse, we usually do what we always have done and, not least, what tradition dictates. This part of the course introduces the concept of learning styles and offers ideas of how to utilize your learning strengths in your daily work. You will be offered an on-line learning styles profile to take before (and, if needed, also after) the course.
