## Assignments for PhD fellows

It is a condition for the participation in the course that each PhD fellow prepares a paper<sup>1</sup> – deadline 13 November 2020 - in which is described and explained the following:

**I) *Your own research project:*** Please give a short explanation of the legal area, legal problems, theories and methods already decided.

**II) *In reviewing the methods of interpretation:*** a) Which interpretation method(s) do you plan to use? b) Which interpretation method(s) are preferred by the actors and authorities of relevance in your project (the courts at international EU and/or national level; the EU Commission; agencies preparing legislation (e.g. as part of implementation of international or EU law); tribunals, compliance committees; administrative authorities; or...).

Is it a grammatical interpretation combined with other legal arguments? Or teleological interpretation combined with grammatical and historical interpretation, comparative law, context or other legal arguments? Consider among others the following approaches:

- (a) a grammatical interpretation using the literal meaning of the term/words used in the statutory rules (e.g. dictionary definitions, focusing on a strict grammatical construction etc.);
- (b) a historical interpretation using the legislative history to reveal the intent of the legislator – taking into account continuation in the content of law (incl. favoring continuation of judge-made law);
- (c) a systematic interpretation considering the context and the legislative intent of provisions – ensuring coherence and consistency;
- (d) a teleological interpretation where the purpose of the law is considered – involving e.g. the comparative law in the interpretation – e.g. as employed by the European Court of Justice;
- (e) a political interpretation where the current governmental policy is guiding the implementation and interpretation; and/or
- (f) a constitutional interpretation. For example respecting special principles such as: rule-of-law-principles; fundamental rights; principle of non-retroactivity; and principle of non-extraterritorial application; principles of direct effect and supremacy; implied competences; state liability; separation of powers (institutional balance) etc.

**III) *Implementation:*** Are there any aspects of implementation e.g. from international and EU law to national law in your project? Implementation from national law to practise?

**IV) *Application:*** Are there any differences between the interpretations and applications made by the actors/users of the law that your project is focusing on – e.g. depending on their role or the regulatory levels? Or depending on their nationalities in comparative research projects?

**V) *Research design and methodology:*** What are your considerations as to how you can design/describe your analytical and methodological approach to these questions in your PhD thesis?
